

# SUPER GREENZITC™

## A CONCENTRATED COLORANT

For use on evergreen trees and shrubs to camouflage the unappealing visual effects of dormancy and discoloration due to disease, drought, or the misapplication of pesticides.

**ACTIVE INGREDIENT:** Pigments solids ..... 78%

## KEEP OUT OF REACH OF CHILDREN

### CAUTION

#### FIRST AID

- IF SWALLOWED: Drink 1 or 2 glasses of water, induce vomiting by touching the back of the throat, contact a physician or poison control center.
- IF INHALED: Move to fresh air.
- IF ON SKIN: Wash exposed areas with soap and water, seek medical attention as needed.
- IF IN EYES: Flush eyes with water, contact a physician for irritation as needed.

#### PRECAUTIONARY STATEMENTS

##### • HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION - Harmful if swallowed. Avoid contact with skin. Wash hands thoroughly after using. Avoid contact with eyes. In case of contact with eyes, flush eyes for 15 minutes with water and seek medical attention if irritation persists. If taken internally, induce vomiting and seek medical attention. Avoid breathing spray mists. Keep children and domestic animals away from treated areas until the spray solution has dried.

##### • PERSONAL PROTECTIVE EQUIPMENT (PPE)

Wear protective clothing when handling or applying this product, including long pants, long-sleeved shirt and impermeable gloves and boots.

##### • ENVIRONMENTAL HAZARDS

Do not apply directly to water or contaminate water by cleaning of equipment or disposal of waste. Do not contaminate irrigation ditches or water used for domestic purposes. Do not spray when the wind is blowing sufficiently to cause drift. Use coarse sprays to minimize drift. Maintain spray boom pressure as low as possible to minimize drift. Flush spray tank and lines in a suitable non-crop area after use.

##### • STORAGE AND DISPOSAL

**Storage:** DO NOT contaminate water, food or feed by storage or disposal. Store in original containers only in a secured area inaccessible to children and unauthorized persons. KEEP FROM FREEZING

**Chemical disposal:** Spray solution, tank rinsate or product that cannot be used according to label instructions must be disposed of in accordance with all applicable federal, state and local laws.

**Container disposal:** Do not reuse empty container. Triple rinse (or equivalent) and offer for recycling, reconditioning or dispose in a sanitary landfill, or by other methods according to federal, state and local laws.

#### USER SAFETY RECOMMENDATIONS

Users should wash hands before eating, chewing gum, using tobacco or using the toilet. Wash outside of gloves before removing.

**Keep From Freezing**

## GENERAL INFORMATION

Super Greenzit C is a permanent blue-green pigment, which on mixing with water and spraying imparts natural blue-green color to trees when used as directed. Always spray trees prior to cutting.

Trees are usually sprayed in November in the mid-Southern and deep Southern states and in September in the upper Midwestern states and the Northeastern States.

Do not spray when it is below freezing or when frost is still on the tree. To insure drying, it is best to spray when air temperature is above 40F and when no immediate rain is anticipated. The spray will dry in 15 minutes on a moderately warm or sunny day. It may take a longer period to dry when it is cool and cloudy.

## DIRECTIONS FOR USE

**Spray Precautions (Read Before Using Product):** Stir or agitate Super Greenzit C before using. Do not spray when it is below freezing or when frost is still on the tree. To insure drying, it is best to spray when air temperature is above 40F and when no immediate rain is anticipated. Do not spray on windy days. Be careful not to spray pavements, buildings or masonry, as staining will occur. It is imperative that spray tanks be washed thoroughly immediately after use. Also remove and wash nozzles, tips and screens. Wear only old clothing and shoes as indelible staining may occur.

**Mixing:** Shake or agitate Super Greenzit C immediately prior to use. Add the Super Greenzit C to the entire amount of water in the spray tank and agitate continuously with paddle agitation and/or bypass agitation. Do not prepare any more solution than will be used at one time.

**Application Equipment:** Various types of sprayers may be used (hand or power). Backpack, knapsack and portable sprayers such as manufactured bei Solo, Birchmeier, Chapin, D.B.Smith and others may be used. As well as mist blowers and most

commercially available power sprayers. Relatively low pressure and relatively coarse droplet size are ideal.

**Dilution and Coverage:** Dilute 1 gallon of Super Greenzit C with 50 gallons of water. This dilution will cover approximately 200 average size trees. If the trees to be treated have become yellowed due to stress, drought or dormancy, dilute 1 gallon of Super Greenzit C with 33 gallons of water. This dilution will cover approximately 100 average size trees. Personal color preference and many other factors may indicate a dilution and coverage other than the labeled recommended rate.

**Tree Species:** Super Greenzit C has been used on, and is recommended for the following species: Eastern white pine (*Pinus strobus*), Red Pine (*P.resinosa*), Scotch pine (*P.sylvestris*), Austrian pine (*p.nigra*), Virginia Pine (*P.virginiana*), White spruce (*Picea glauca*), Blue spruce (*P.pungens*), Balsam fir (*Abies balsamea*), Douglas fir (*pseudotsuga menziesii*) and Eastern red cedar (*Juniperus virginiana*). Super Greenzit C is also useful on all types of natural wreaths.
