

Alude™ Systemic Fungicide

FEATURES*	ADVANTAGES	BENEFITS
Broad Spectrum Disease control: <i>Pythium</i> spp., <i>Phytophthora</i> spp., Fire Blight, Bacterial Blight (<i>Xanthomonas campestris</i>) and Downy Mildew	Labeled for control of most water mold diseases and some bacterial diseases (see label for a complete list).	Effective control of water mold fungi, especially when resistance to other chemistries may be present.
For use on: annual and perennial flowers, bedding plants, foliage plants, ground covers, deciduous and evergreen trees and shrubs, and vegetable transplants.	Wide range of plant materials and use sites (Do not apply to plants that are moisture or heat stressed.).	Flexibility for use on multiple crops and use sites.
Applications method: spray; chemigation; drench; soil incorporation; root dip	Flexibility of use.	Allows end-user to select the application method that is most appropriate and convenient.
Active Ingredient: Mono- and dipotassium salts of phosphorous acid in a stable, liquid formulation	Formulation is aluminum-free. Mono and di-potassium formulation more effective than products that only contain dipotassium salts.	<ul style="list-style-type: none"> • Fast leaf penetration and plant uptake. • Tank mix compatible. • Easy to handle.
True, Systemic Mode of Action	True, systemic mobility in the plant, moving both up and down in the plant's conductive tissue from the point of entry into the plant.	<ul style="list-style-type: none"> • Greater protection of untreated plant parts. • Enhances plant's natural defense mechanisms. • Decreases plant stress.
Signal Word: Caution	Lower toxicity than most conventional pesticides.	Lower risk profile benefits applicators and the environment
<ul style="list-style-type: none"> • WPS uses: 4 hour REI • Non-WPS uses: do not enter treated area without protective clothing until dry 	Shorter REI than other products in the market place.	Allows the end-user to apply product and get back to work faster.
Tank mix compatible with most commonly used pesticides	Allows the end-user to tank mix products for each unique situation.	Easily fits into most end-user's disease control programs.
Resistance Management Information: FRAC Group 33	<ul style="list-style-type: none"> • Multi-site mode of action. • Only fungicide group containing products with true systemic activity. 	<ul style="list-style-type: none"> • Low risk of resistance. • Offers another MOA for use when resistance to other chemistries may be present.

* Always read and follow all label instructions carefully.
