

Tristar[®] 30 SG Insecticide

FEATURES*	ADVANTAGES	BENEFITS
Broad Spectrum control: adelgids, aphids, beetles, fungus gnat larvae, caterpillars, weevils leafhoppers, mealy bugs, plant bugs, psyllids, sawfly, scale (hard & soft), leaf miner, thrips, whiteflies.	Broader label than most insecticides on the market (see product label for a complete list).	Use alone or tank mix to control a number of pests that may infect ornamentals.
For use on: ornamental and flowering plants: landscape ornamentals, bedding plants, flowers for cutting, foliage plants, potted flowering plants	Wide range of plant materials and use sites benefit the end-user.	Flexibility of use of this product on multiple crops and multiple use sites with low risk of phytotoxicity.
Active Ingredient: Acetamiprid provides complete life cycle control, from egg to adult	<ul style="list-style-type: none"> Member of the nicotinyl group Provides effective control of eggs, larvae and adults of more species than other nicotinyls. 	Control of all life stages provides better all around control of pests.
Application method: foliar spray	Widest control spectrum in the nicotinyl class when applied as a foliar spray.	<ul style="list-style-type: none"> Fast acting. IPM compatible.
Translaminar, Systemic Mode of Action	Translaminar (across a leaf blade from one surface to the other) & upward movement through the plant.	<ul style="list-style-type: none"> Provides greater protection of untreated plant parts. Provides control of underside feeding insects without directly spraying underside of leaf.
Signal Word: CAUTION	Lower risk profile than other broad spectrum insecticides that carry the signal word 'Warning'.	Lower risk to handlers and plant materials than some other products in the market place.
<ul style="list-style-type: none"> WPS uses: 12 hour REI Non-WPS uses: keep out of treated area until dry. 	Shorter REI than other products in the market place.	Allows the end-user quicker re-entry after application.
Soluble Granular Formulation includes a handy, accurate measuring device	<ul style="list-style-type: none"> Easy to mix, measure and handle Formulated to accurately fill spray tanks from 1 to 50 gal and over. <i>(2 package sizes – 8oz. or 2lb container)</i> 	Easy to use, especially for small volume users.
Tank mix compatible with many commonly used miticides and insecticides	Allows the end-user to tank mix products according to their needs.	Easily fits into a comprehensive insect control program.
Resistance Management Information: IRAC Group 4A	Identifying IRAC grouping allows for easier implementation of a rotational program for resistance management.	Gives end-users another option to rotate into resistance management programs.

* Always read and follow all label instructions carefully.
